

AssetMap

AssetMap is a specialist system for capturing infield data to manage and maintain assets.

RapidMap understands that often the most effective data capture solutions are underpinned by a meticulous approach to infield processes.

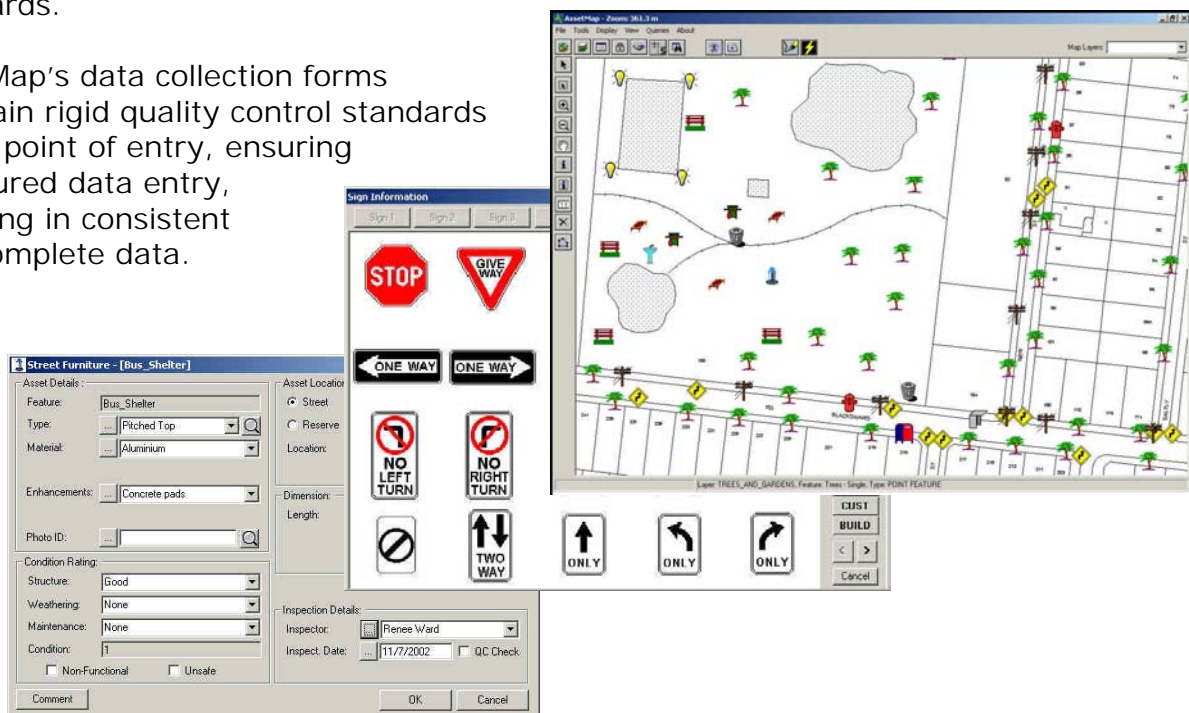

Thinking strategically, analytically, creatively, critically

<p>Specialist layers: Comprehensive layers for additional & specific attribution of assets</p> <ul style="list-style-type: none"> • Footpath, Road, Kerb & Channel Defects • Arboricultural Layer • Drainage Networks • Sign Inventory 	<p>Basic Layers: A diverse set of layers for different asset types</p> <ul style="list-style-type: none"> • Sports grounds & Playground equipment • Miscellaneous Asset groups • Trees & Gardens • Reserve Assets • Street Furniture • Traffic Control
---	---

METICULOUS, PRECISE, DYNAMIC

We strive to provide data capture solutions that are always easy to use, robust, reliable – even under extreme situations and above all, meet the highest quality standards.

AssetMap’s data collection forms maintain rigid quality control standards at the point of entry, ensuring structured data entry, resulting in consistent and complete data.

Benefits:

-  Sign assets have Australian Standard codes & sizes
-  Icons and line styles in the map graphically represent each asset and can be customised to suit your project needs.
-  Digital Cameras can be directly interfaced to cater for non-standard signs and to build libraries of asset types.
-  You can access, crop, enhance, name, allocate descriptions and save the images.
-  A selection of in-built measuring tools allow accurate positioning of assets.
-  A configurable GPS module allows autopanning, tracking, averaging and offsetting.
-  Ability to monitor GPS input, satellite visibility and differential status
-  Customisable forms and picklists allow you to configure AssetMap to suit individual project requirements.
-  Find location to pan to required address
-  Ability to extend polylines manually or with GPS
-  Strategic resource management capabilities and proactive maintenance advantages
-  Data capture in a format suitable for importing into your organizations GIS or database

Operating Standards:

Designed to run on a pen computer with a full windows operating system

RapidMap - forward thinking, a meticulous approach, a global perspective.
